

DILTON DSOUZA

Software Engineer | Java | Spring Boot | Distributed Systems | AWS

+91 7378894373 | diltondsouza1@gmail.com | linkedin.com/in/diltondsouza

Software Engineer with experience building scalable backend systems using Java, Spring Boot, and REST APIs. Skilled in SQL, caching, and distributed systems, with hands-on experience in performance tuning, debugging, and CI/CD-driven development.

EXPERIENCE

Software Engineer - Performance, IDFC FIRST BANK LTD

Jan '24 - Present

- Designed and implemented an **AI-assisted RCA framework** that automatically correlates JMeter/LoadRunner performance test results, Kibana logs, and Grafana infrastructure metrics for high-latency and error-prone time windows, enabling **faster root cause identification** and **reducing manual analysis effort**.
- Developed a **Centralized Performance Testing Platform** using **Java Spring Boot (MVC architecture, REST APIs)** and **MERN Stack** to manage the end-to-end performance testing lifecycle, capturing application NFRs, **container-based test execution orchestration**, and automated result analysis, **reducing overall performance testing cycles by ~40%**.
- Designed and optimized **RESTful APIs** handling **high-volume concurrent requests**, with **efficient database interactions** ensuring **low latency** and reliable data flow across distributed services.
- Implemented **scalable microservices architecture** with clear service boundaries improving system modularity.
- Built a **Redis-based test data management service** for **high-throughput data access**, improving performance in concurrent environments improving **CI/CD execution speed by 40%**.
- Worked with **relational databases (SQL)** for data storage and retrieval, **optimizing queries** for efficient data handling.
- Developed backend components with focus on reliability, including **unit testing** and debugging across environments.
- Integrated performance testing into CI/CD pipelines (Jenkins, Bitbucket) with Grafana-based observability dashboards, enabling real-time monitoring, trend analysis, and faster feedback cycles (30% improvement)
- Leveraged Dynatrace, Grafana, Kibana (ELK), and Oracle AWR** reports to perform **end-to-end root cause analysis** to identify **slow SQLs, lock contention, CPU bottlenecks, wait events, and latency issues**.
- Performed JVM and application-level performance analysis** using **thread dumps, GC logs**, and monitoring tools to diagnose memory, concurrency, and latency issues.
- Performed capacity planning and performance tuning** by analysing system behaviour under load, improving critical API response times by up to 60% through **code level optimizations, query optimizations and configuration tuning**.
- Led the design and execution of large-scale performance tests (load, stress, endurance)** using LoadRunner, JMeter and Gatling for core banking systems (CBS, NACH, Payments, Wealth, Loans) simulating 10K+ concurrent users, identifying API, database, and infrastructure bottlenecks, preventing multiple production incidents.
- Developed a WebLogic analysis tool** to extract and evaluate JVM configurations, GC settings, thread pools, deployment settings, accelerating troubleshooting and environment validation while **reducing manual effort by 80%**.

Programming Analyst, ZEUS LEARNING

Aug '23 - Jan '24

- Developed extensive React-based UI components for client-facing applications, ensuring cross-browser compatibility.
- Built automated UI test suites using Playwright, improving regression coverage and contributing to overall product quality.

SKILLS

Languages: **Java, Python, JavaScript, TypeScript**

Backend & Frameworks: **Spring Boot, REST APIs, JPA, Hibernate, Microservices Architecture, Distributed Systems, API Design**

Databases: **MySQL, PostgreSQL, MongoDB, Oracle DB, Redis**

DevOps & Cloud: **Jenkins (CI/CD), Bitbucket, Git, Linux, AWS, GCP, Docker**

Observability & Debugging: **Dynatrace, Grafana, ELK, Log Analysis, Metrics Monitoring, Root Cause Analysis**

Performance: **LoadRunner/JMeter/Gatling, Load/Stress/Endurance Testing, Scalability Testing, Capacity Planning**

Concepts: **Data Structures & Algorithms, Object-Oriented Programming, System Design Fundamentals, Performance Tuning**

CERTIFICATIONS

Google Cloud Certified - Associate Cloud Engineer

Nov '23

Google Cloud Platform (GCP), IAM, Compute Engine, GKE, Cloud Storage, Cloud Operations, Terraform, Docker, Kubernetes.

EDUCATION

Bachelor of Engineering in Computer Science, MUMBAI UNIVERSITY - 9.57 CGPA

Aug '19 - May '23

Data Structures & Algorithms, Object Oriented Programming, Database Management Systems, Operating Systems
